Lisa:

The EPA issues ID numbers to US companies which are required to have one, based on the regulations they are subject to because of the type of business(es) they are involved in. US companies obtain an EPA ID number by applying at their EPA regional office, which in your case is Region II in New York City.

Exporters of waste batteries that are subject to the SLAB regulations do not have to have an EPA ID number if that is the only EPA regulated business they are involved in. If you were a hazardous waste exporter notifying through our office, you would have to have the ID number. Typically they are 12 characters long, such as NYD123456789. If you are interested in finding a complete list of US "subjected" businesses, the regional office would probably have that.

If you have additional questions I am at 202/564-5032 or nelson.scott@epa.gov.

FYI, the annual report for SLAB exporters is due March 1.

Thank you.

Hi Scott,

My name is Lisa Hoad and I own a scrap recycling facility in Bath, NY. I am working on submitting a US EPA Report for waste batteries that I shipped to Tonolli Canada LTD. in Canada. It asks for an EPA ID#. I am not sure what that is, could you help me with that?

Thank you,
Lisa Hoad
